I will set up a meeting for Monday to debrief on the Chemours meeting, discuss how we want manage and communicate Chemours issues, and next steps.

The meeting lasted almost 5 hours and we didn't make it through the agenda, attached is a presentation on the topics we covered. Let me know if you have any immediate questions.

Chad

I think that's a good idea to get all the info together before briefing Cathy and Karen.

Just FYI -- I'm out tomorrow, but available all next week.  
Pam

Pam,

I don't think anyone has responded to Jackie yet. I think it would be a good idea to get on the phone with R5 since we've extensively coordinated with them on the SDWA 1431 order.

Chad, I heard you were going to set up a briefing for Cathy Libertz and Karen Melvin. Maybe we should talk with Region 5 folks, first. What do you think?

Rick

Hi Roger and Chad,

I see you were both cc'd on this. Did someone already respond to Jacqueline's (or does she go by Jackie?) query? Should we ask for a conference call with the group so we get on the same page? I'd like to stay ahead of the mania if at all possible.

Chad, it would be good to get a bit about what happened at the meeting in D.C. yesterday.

Thank you and let me know how you all would like to proceed.  
Pam

PRIVILEGED AND CONFIDENTIAL COMMUNICATION

Good morning – I actually just returned from an enforcement meeting in DC with Chemours, and R4 also attended. The R4 attendees were:

- Carol Kemker (Region 4-Air, Pesticides, & Toxics Management Division)
- Carol Monell (Region 4-Resource Conservation & Restoration Division)
- Jeaneanne Gettle (Region 4-Water Protection Division)

I'm happy to talk more about PFAS, but it may be prudent for you to check in with the above folks first about our meeting with Chemours. I understand that HQs is going to invite the regions to participate on their weekly enforcement discussions about Chemours, which will include both WED and WCED, but I do not know who in each region specifically will be invited. In addition, I'm cc'ing R3 water (who also attended yesterday's meeting) because the facility is located in R3 and any RCRA inspections or evaluations would be handled by R3. We know that DuPont disposed of PFOA waste in multiple locations in Ohio, and presumably GenX is also included in that waste, but it's not an issue that I think we've fully researched as our focus in over the past year has been on GenX in drinking water. R5 would like to be included in any follow-up discussions about RCRA given historical disposal locations in Ohio. My calendar is up to date for us to talk further. -Jacquie

Sincerely,

***Jacqueline Clark***

Hi –

Reaching out to see if we can find a good time to catch-up in re: PFOA/PFOS in our regions. We last spoke 1/24/2018.

R4-RCRA is evaluating the treatment and storage of certain GenX containing spent material received in Fayetteville, NC, by Chemours. The materials are generally described in the enclosed documents.

Can you say whether these or similar materials are generated at the Washington Works facility, and whether R5 has accurate hazardous waste determination information it can share with R4?
